# SAP S/4HANA Cloud

With the SAP S/4HANA family, SAP is providing a new generation of business applications – best-of-breed enterprise software for big data, designed to help you run simple in the digital economy.

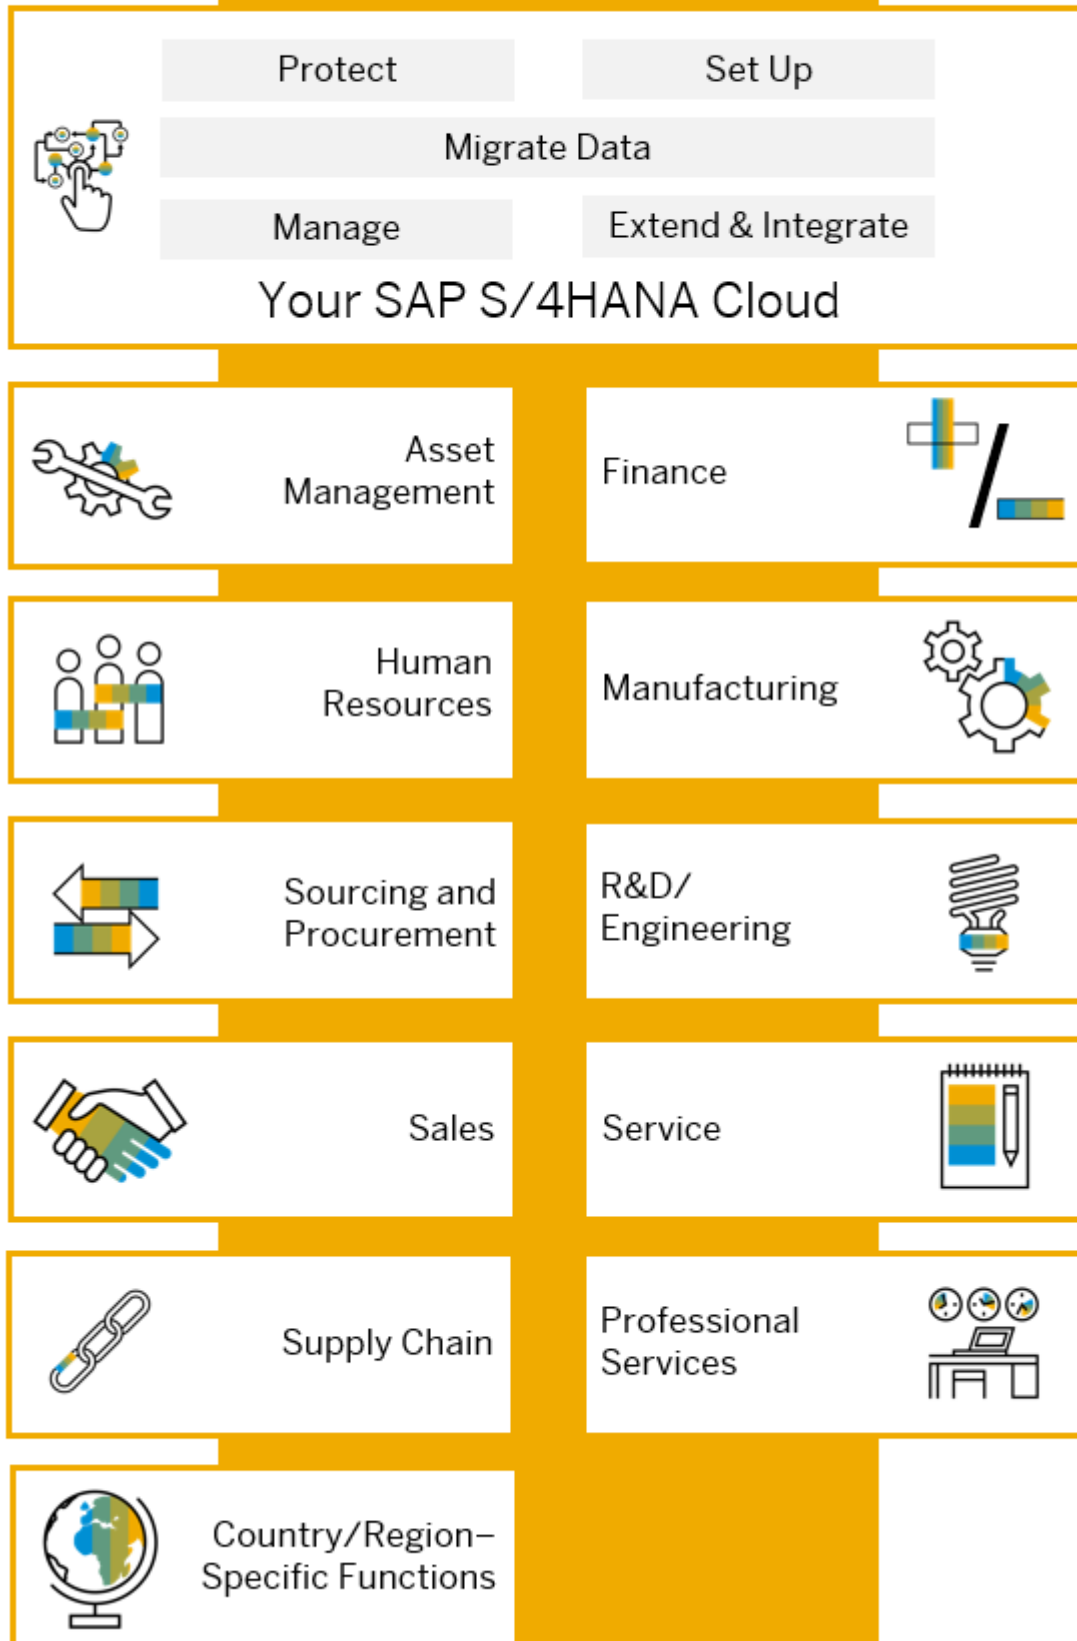

The SAP S/4HANA family is fully built on the in-memory platform SAP HANA. Using the advanced potential of SAP HANA, these products are designed for your digital business and provide instant insight into what is going on in your business by using a single source of truth, real-time processes as well as dynamic planning and analysis. With SAP Fiori user experience and a less complex data model, they are designed to run simple, and in parallel reduce the data footprint of your company.

With all these aspects, SAP is protecting your investments by facilitating next-generation business applications.
